In the Hoop

Key Fob Instructions:

1. Hoop your stabilizer. You can use water soluble stabilizer or tearaway stabilizer.
2. Stitch design step 1 onto the stabilizer. This is your placement stitch and will show you where you need to put your fabric. Stitch the design onto a sturdy non-fraying material such as felt, vinyl, or canvas. (If you want to try a less sturdy material, you will need to add several layers of stabilizer but results will vary).
3. Place your fabric on top of the placement stitches. (If you like, you can use a little bit of adhesive to keep the fabric in place).
4. Stitch the tack down (if applicable) and all of the design detail steps. These are the steps that create the cute part of the design. The number of steps will vary depending on your design. Stop before stitching the last outline step(s).
5. Once the design is finished, take the hoop off of your machine, but DON'T remove the design from the hoop. Flip the hoop over and use some adhesive to attach the bottom piece of vinyl or felt on the underside of the hoop.
6. Place your hoop back on the machine and stitch the final step.
7. Take everything out of the hoop and trim around the edge of the outer stitch line.
8. The stitching of your key fob is now complete. Add snaps on the strap section according to the instructions included with your particular snap to complete the key fob.
