Wallet or the main part (chamomile)

(only 1 size)

The design is compatible (suitable) with base empty wallet. This main part can be an independent product. It is enough to fold it along the bottom line and sew it on the sides.

The basic wallet is sold in my store.

Recommended fabrics.

The choice of fabric depends on your preferences.

I use eco-leather and vinyl leather with a thickness of 0.6-0.85 mm. If the skin is very thin, it should be glued with a thin dublerin. You can also use cotton linen, satin.

The filler – rubber foam with a thickness of 5 mm or polyester batting 80 or 100.

Hoop tearaway or water-soluble stabilizer.

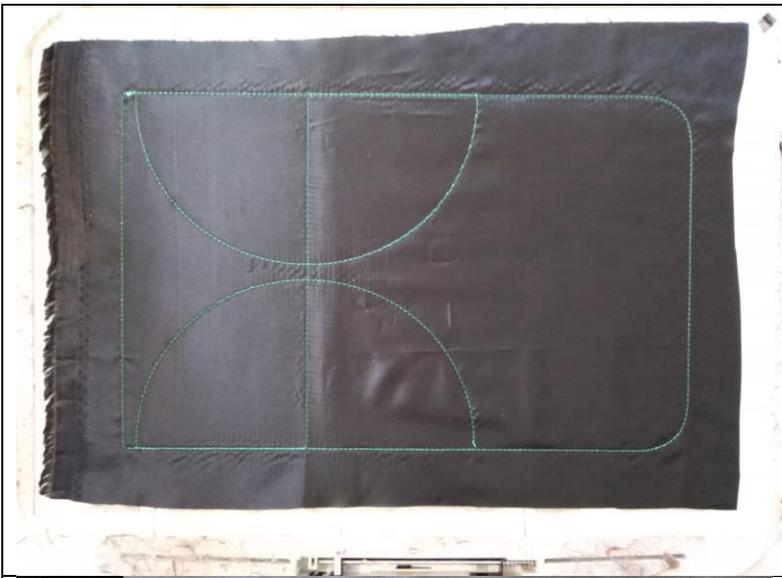

Stitch Color 1 - the placement line for design

Remove the hoop from the machine and turn to the back side.
Place the interfacing fabric face up on the back of the hoop.
Fix it with glue or adhesive tape.

Stitch Color 2

If you sew the wallet with 4 compartments - These are auxiliary stitches that will serve you in the future.

Put polyester batting.
You can use temporary fixation glue.

Stitch Color 3

Cut off the exceed the polyester batting around near stitch.
I recommend cutting the polyester batting at this stage to avoid thick seams.

Put the main fabric face up.

Fix it with glue or adhesive tape.

Please note that in this model there is no any stitch that fixes the fabric to the stabilizer, since numerous tests of various fabrics have shown that some fabrics may move slightly while embroidering and therefore a fold can appear at the edge of the embroidery.
