A Hug Longer Digital Design

For this project you will need:

- Wash away stabilizer. I like to use badge master but any thicker wash away stabilizer will work
- Embroidery thread. The background of this patch is entirely thread (no material) so you will need a good amount of the color you choose for the background.

1. Hoop stabilizer and run the first color which will be an outline of where the patch will stitch.
2. Stitch out the second color for the background of the patch. The entire background is made of stitches and no material is needed.
3. Color three will stitch out the outer border of the patch with a merrowly stitch.
4. The final color will stitch the words.

Cheat Sheet Basics

A Hug Longer Digital Design

Like most things Embroidery takes practice. I have written this cheat sheet to help you determine why your design did not stitch as it should have. Even those of us who have been doing embroidery for a very long time can benefit from these reminders. All Hug Longer designs have been tested prior to release.

My Embroidery file will not fit in the hoop or will not load in my machine

- Have you tried to rotate the file from portrait to landscape or visa versa?
- Verify you have the proper size and format loaded. Is the file unzipped?
- Did you resize the file? Or add to the file?
- Have you tried re downloading the file?

My stitches are not in the correct places

- Is the hoop free moving without obstructions in the way?
- Are you using proper stabilization?
- Is the thread moving freely, have you tried rethreading?
- Does your machine have proper tension for the thread and bobbin?
- Did you properly hoop your item (not too tightly)?
- Is your fabric too dense for the design?
- Does your machine need service?
