## 1970-TINY SNOWFLAKES

Design:1970-TINY SNOWFLAKES.EMB

1970-TINY SNOWFLAKES

Design Step #Process StepSTITCHOUT:  
See Tips & Prep Section:

Step 1:Proc 1:Stitch felt target.

Proc 2:Place felt within the target lines.

Step 2:Proc 3:Stitch felt tack down

Step 3:Proc 6:Stitch snowflakes

Proc 7:Remove the project from hoop.

Proc 8:Trim around each snowflake on the cut guidelines (the run stitch around each snowflake).

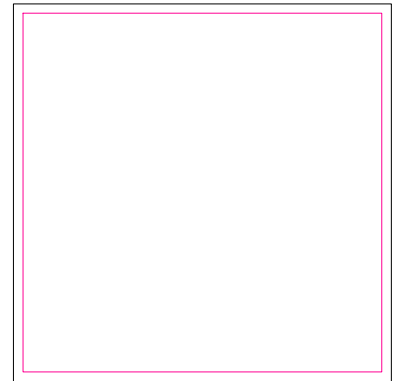

Proc 9:Glue snowflakes to greeting cards or just place inside the folded card.

Happy Stitching!  
Lucinda

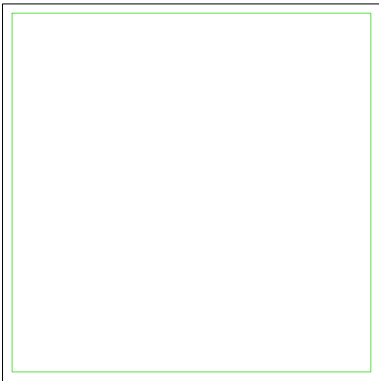

See Terminology Section for acronyms used.

| 1970-TINY SNOWFLAKES |                                                                                                                                                                                                                       |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      |                                                                                                                                                                                                                       |
| <b>TIP #:</b>        | <b>IMPORTANT TIPS:</b>                                                                                                                                                                                                |
| Tip 1:               | The designs are stitched on FELT.                                                                                                                                                                                     |
|                      |                                                                                                                                                                                                                       |
| Tip 2:               | When stitching small designs, consider lowering your machine speed to half or less speed.                                                                                                                             |
|                      |                                                                                                                                                                                                                       |
| Tip 3:               | You may want to consider using the same color bobbin thread as the top thread, when using dark colored threads. If any bobbin thread happens to pull up from the bobbin, the stitch out will still look as it should. |
|                      |                                                                                                                                                                                                                       |
| Tip 4:               | If there are any gaps in the stitching, or pulled up different color bobbin thread, use a PERMANENT FABRIC MARKER to carefully touch up the area in question.                                                         |
|                      |                                                                                                                                                                                                                       |
| Tip 5:               | Use any size hoop, available in your machine brand, that best accomodates the size of the design.                                                                                                                     |
|                      |                                                                                                                                                                                                                       |

|                |                                                                       |
|----------------|-----------------------------------------------------------------------|
|                |                                                                       |
| <b>PREP #:</b> | <b>PREPARATION:</b>                                                   |
| Prep 1:        | Hoop one layer of FNSM.                                               |
|                |                                                                       |
| Prep 2:        | Cut felt to 4.25 x 4.25 inches (felt is NOT hooped for this project). |

**Note:** Some of these terms may not be used in these directions.

| Notes | Terminology:                                                                                                                                                         |

| Floriani Perfect Stick Tearaway Stabilizer | <p>Embroidery in almost any area is achievable! Enjoy quality stitching with no residue build up or gummy needles. Floriani Perfect Stick Stabilizer is ideal for hard to hoop items such as bulky towels, backpacks, collars, napkin corners, or socks. Also use for fabrics that can be damaged by the hooping process, a.k.a. Hoop Burn; fabrics like leather, velvet, ultra-suede and satin. With Perfect Stick Stabilizer you will enjoy the stability of a firm yet flexible stabilizer that will support all types of embroideries on most fabrics.</p> |  |

| Aileen's Fabric Fusion permanent fabric tape | <p>Whether you know how to sew and don't have time, or have never picked up a needle and thread in your life, Aleene's Fabric Fusion Permanent Tape is an easy alternative. Just press in place for instant permanent hold that's great for creating hems and much more. This double-sided instant fabric tape adheres a variety of fabrics without heat setting for a permanent bond that remains flexible, even after washing. So your fabrics move with you, not against you.</p> |  |

| Item Name                                    | Description                                                                                                                                                                                                                                                                                                                                                                        | Photo                                                                                |
|----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Aileen's Fabric Fusion permanent fabric glue | This permanent fabric adhesive offers crafters and fashion artists a great alternative to a needle and thread! This clear, water-based adhesive is nontoxic and machine washable, offering a permanent bond between fabrics and embellishments to fabrics with just the squeeze of a bottle. It is ideal for using with most fabrics, trims, sequins, rhinestones, beads and more. |   |
| Alene's Tack-It Over & Over                  | <p>Use to temporarily position appliques or the seam allowances in preparation for stitching the seam.</p> <p>Also, fantastic to use with die cutting mats. Clean the mat with diaper wipes, then apply this product with a foam brush to the mat. The mat tackiness is now restored.</p>                                                                                          |  |

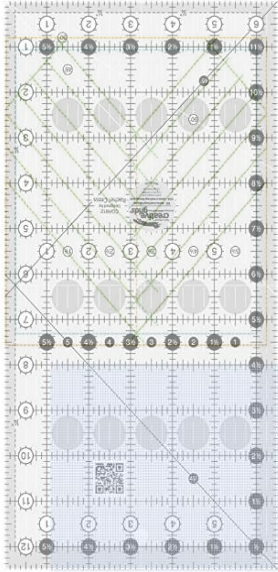

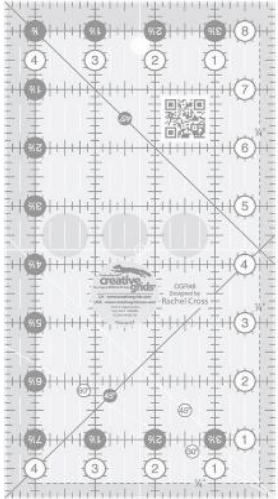

| Item Name             | Description                                                                                                                                                                                                        | Photo                                                                                |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|
| Folded Corner Clipper | This tool has many uses. My favorite use is cutting binding tail ends for the final join, after the binding is sewn to the quilt. The tails fit together like butter. No struggling to match up and sew the tails! |   |
| Clover Wonder Clips   | So much better than pinning so many cases, especially attaching binding to a quilt.                                                                                                                                |  |
