| 2060-MINI FONT 2 (used with 1562-GIFT TAG STKG design) |  |  |
|--|--|--|
| TIP #:   | IMPORTANT TIPS:  |  |
| Tip 1:   | For best stitch out results, use Terial Magic to treat your fabric before stitching. I saturate the entire fabric, so there are no missed spots, and then follow the manufacturer's instructions. <b>DO NOT TREAT FELT (THIS PROJECT) WITH TERIAL MAGIC. However, for regular fabrics, such as cotton, DO use Terial Magic.</b>  |  |
| Tip 2:   | Slow your machine speed down to half (or less) speed. For areas where you are stitching on top of already stitched objects, slow your machine to the lowest or second lowest speed to help prevent thread and needle breaks. Speed is not always your friend in machine embroidery.  |  |
| Tip 3:   | You may want to consider using the same color bobbin thread as the top thread, when using dark colored threads. If any bobbin thread happens to pull up from the bobbin, the stitch out will still look as it should.  |  |
| Tip 4:   | If there are any gaps in the stitching, or pulled up different color bobbin thread, use a PERMANENT FABRIC MARKER to carefully touch up the area in question.  |  |
| Tip 5:   | Use any size hoop, available in your machine brand, that best accommodates the size of the design.   |  |
| Tip 6:   | For designs where batting and/or fabric are floated on top of the stabilizer (instead of being hooped with the stabilizer), I use white thread for the batting and fabric target and tack downs (Color Chart shows neon pink and royal purple, which in combination, are always used to signify a target, then a tack down). If this tip is applicable to this design, it will be noted in the Stitch Out section below.   |  |
| Tip 7:   | <p>For designs where fabric and stabilizer are hooped together, cut the materials large enough so that, when hooped, they resemble the photo below. If this tip is applicable to this design, it will be noted in the Stitch Out section below.</p> <p>Before you cut the materials, you can "audition" by marking the materials where you plan to cut, then hooping them. There should be about 5/8-inch of the fabric and stabilizer showing between the inner and outer hoop intersections.</p> |  |
|  |    |  |

|  | <b>TIP #:</b> | <b>IMPORTANT TIPS:</b>   |
|--|---------------|--|
|  | Tip 8:        | <p>If the design includes targets, tack downs and/or seam and cut guidelines, use different color threads, than used in the batting and fabric targets and tack downs, when stitching the final two steps (the seam guideline and the cut guideline).</p> <p>This will help to assure you can match up the seam guidelines when joining the blocks together. Using a different contrasting color will help assure that you don't accidentally trim the block on the seam guideline instead of the cut guideline.</p>   |
|  | Tip 9:        | <p>There are usually more jumps (trims) in redwork designs than in regular designs. However, for any design, it is easier to cut these threads as the design stitches out. This is especially true, if another object is going to stitch on top of the jump threads. After the next object stitches 3 or 4 stitches, I stop the machine and trim the threads to prevent the jump thread being stitched in place.</p> <p>I choose to manually cut the jumps (using Kay Buckley's Perfect Scissors (red-handled, 4-3/4 inch, curved blade), instead of using the machine's cutting feature, as too frequently, "birds' nests" form on the underside of the hoop or the needle and/or bobbin become unthreaded when using that feature.</p> |

|         |                |   |
|---------|----------------|---|
|         | <b>PREP #:</b> | <b>PREPARATION:</b>   |
|         |                | <b>Note: This design does not use batting. Begin on Prep 3 step below:</b>  |
|         | Prep 1:        | If the design has batting, cut it to fit within the batting target lines. I use 505 Adhesive Spray to affix the batting within the target lines or SET. After stitching the batting tack down, trim away any batting covering the batting target lines, so as not to catch the batting in the seam when joining blocks. |
|         |                | Note: Skip Steps 1-4, if you do not want to apply batting to your design during the embroidery process. If you are excluding the batting, hoop the fabric and stabilizer together. See Tips & Prep Section PDF for more information, regarding hooping.   |
|         |                |   |
|         | Prep 2:        | When floating fabric on top of the stabilizer, cut fabric the same size as the entire inside area of your hoop, so that it touches the inside of the frame all around and lays flat when secured with 505 Adhesive Spray or SET.  |
|         |                |   |
| Step 5: | Proc 3:        | Upper and lower case alphabets (fonts), to use in adding names to the cuffs of your stockings (design 1562-Gift Tag Stkg), are listed individually, designs 2059-Mini Font 1 (lowercase) and 2060-Mini Font 2 (uppercase).  |
|         |                |   |
|         | Prep 4:        | Use a 90/14 embroidery needle when stitching on felt.   |
|         |                |   |
|         |                | Note: Be sure to read the TIPS, PREP, STITCH PDF and Terminology Sections.  |

|--|--|---|
| Floriani Perfect Stick Tearaway Stabilizer | <p>Embroidery in almost any area is achievable! Enjoy quality stitching with no residue build up or gummy needles. Floriani Perfect Stick Stabilizer is ideal for hard to hoop items such as bulky towels, backpacks, collars, napkin corners, or socks. Also use for fabrics that can be damaged by the hooping process, a.k.a. Hoop Burn; fabrics like leather, velvet, ultra-suede and satin. With Perfect Stick Stabilizer you will enjoy the stability of a firm yet flexible stabilizer that will support all types of embroideries on most fabrics.</p> |  |
